## **Specification Sheet for Dish Antenna**

Dish antenna must be gray or black in color. Size is limited to 24 – 30 inches in diameter.

Number of dish antenna systems is limited and cannot exceed two (2).

Dish Antenna must be mounted to the chimney.

Antenna wiring must be securely fastened to the Antenna. Path for wires must follow from the antenna system down the rear of the unit. All wiring and cabling must be anchored to the structure.

Standard practices for wiring to enter the unit will be used.

It is highly recommended to seal any holes, where entry into the structure exist due to the possibility of water entering the unit causing water to puddle and or interior damage.
